

SANDMEIER & Charolais

44th Annual Bull Sale
FRIDAY, MARCH 7, 2025
— 1:00 PM at the Ranch, Bowdle, SD —

SANDMEIER Charolais

44th Annual Bull Sale

FRIDAY, MARCH 7, 2025

11:30 A.M. - Complimentary lunch served • 1:00 P.M. Sale Starts

LOCATION

Ranch - 13123 322nd Ave. - Bowdle, SD 57428
(3 miles west of Bowdle on HWY 12 and 2 3/4 miles north)

AUCTIONEER

Seth Weishaar, Belle Fourche, SD - 605-210-1124

SALE DAY PHONES

Matthew 605-281-1564

LIVESTOCK PRESS

Donnie Leddy, Cattle Business Weekly 605-695-0113
Hadley Schotte, AICA 785-562-6632
Dan Piroutek, Tri-State Livestock News 605-544-3316
Kelly Klein, Tri-State Livestock News 701-320-5817
Kirby Goettsch, Farm and Ranch Guide 605-380-3939

LIABILITY

All persons who attend the sale do so at their own risk, legal or otherwise, for their safety or for behavior of the animals. The owners, sale management firm, and the sale staff assume no liability for property loss or any accident that may occur.

SUPPLEMENTAL INFORMATION

A supplemental sheet will be available sale day. Announcements from the auction block regarding the cattle selling in this sale take precedence over information listed in the catalog.

TERMS AND CONDITIONS

Please settle immediately after the sale with cash or good check.
Cattle will sell under the suggested Terms and Conditions of the American International Charolais Association. Each animal will be at the purchaser's risk as soon as the animal is sold.

DELIVERY

Free delivery will be provided to any buyer in South Dakota, all other arrangements to be at settlement. There will be a \$75 per bull credit on each bull taken home sale day.

HEALTH

Herd health is in A #1 order to the best of our abilities. At weaning all bulls were vaccinated for: IBR, BVD, PI3, BRSV, 7-Way and Haemophilus. Herd health is under the direction of Dr. Holly Roe- Johnson, Hosmer Vet Clinic.

BREEDING GUARANTEE

All bulls will be guaranteed for their first breeding season.

PRE-SALE VIEWING

Contact Matthew or Cal to view the cows any time before the sale.

ONLINE BIDDING/VIEWING

Sale will be broadcast on DVAuction. View sale from your phone, or desktop computer and bid with confidence! Visit DVAuction for more information.

This sale will be broadcast live on the internet.

Real time bidding & proxy bidding available.

Bulls Sell in Catalog Order

2 yr old lots: 1-10, 31-45, 61-118

Fall lots: 11-15, 46-50 , 119-126

Yearling lots: 16-30, 51-60 , 127-159

Dear Cattlemen & Friends,

On behalf of all of us here at Sandmeier Charolais, I would like to invite you to join us at the ranch on Friday, March 7, 2025, for our 44th Annual Production Sale. We are excited to have you come evaluate this year's set of bulls, as we are very proud of this offering and think it is one of the strongest sets we have offered to date.

As in the past when it comes to developing these bulls, none of them receive any individual feeding or pampering. Each bull competes with all the other bulls in their age group to provide you with an honest performance comparison. These bulls were grown without creep feed and then grown out to do their job for you. The two-year-olds and fall bulls that are in this offering spend their summer running a pasture, growing simply on the grass and Vitalix mineral tubs.

As we continue to move forward, striving to offer you our customers the best genetics possible, we have continued to increase our criteria required to make both our herd and this sale. We are proud of the disposition, structural soundness, and overall performance of this set. This set sells with the same guarantee as in the past and if you have an issue be sure to let us know so that we can make it right.

As always, if you can't make it to the sale, and would like to make a purchase, we will help you with your purchase in a very honest, professional manner. We will again be using DVAuction.com to broadcast the sale which offers you another option to both view our offering and make a purchase if you choose to utilize it. The bulls are also available for viewing any time before the sale, just give me a call and we will gladly take the time to show you the offering.

As we did last year, we will sell the bulls in catalog order starting at lot 1 and ending with 158. This order will have us going back and forth between twos, falls, and yearlings. If you are looking for specific age group the catalog is broke down to have the 2 yr old lots: 1-10, 31-45, 61-118, the Falls lots: 11-15, 46-50, 119-126, and the Yearlings lots: 16-30, 51-60, 127-158.

As always be sure to join us prior to the sale for our complimentary lunch that will begin around 11:30. I hope this letter finds you in good health and we look forward to seeing you March 7th at the ranch.

*Sincerely,
Matthew Sandmeier*

Matthew - 605-281-1564

This bull is one that I really like. He is super eye catching, as calm as can be, and has the measurables that everyone wants. When I was trying to figure out who to start the sale with this bull kept finding his way up to me and I knew he was going to start the sale. This bull has an outstanding mother out of the very popular Tank bull. Be sure to watch this guys video and come see him sale day. PAF, **RETAINING 1/3 SEMEN INTEREST.**

View the Auction Live! Bid Online... you're ringside right at your desk!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.DVAuction.com under the "Register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction – a DV representative will notify you once you have been approved.
3. Tune in for the sale to make your purchases!

High Speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy-bidding – if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

For General Questions Please contact Our Office: 402-316-5460 or support@dvauction.com

This bull is one of my favorites for many reasons. His mother is one of the best mothering cows we have, she raised this calf with just 2 tits. She got her bag wire cut and only has 2 functional tits left. So don't hold his adjusted weights against him there is a lot more to this calf than what is shown. PAF, HOMO-POLLED. **RETAINING 1/3 SEMEN INTEREST.**

We have learned that these 1010 sons grow after weaning they are usually towards the top of the gain and this bull is no different. A maternal brother sells as lot 89.

USING EPDS FOR SELECTION

Cattle Evaluations use the term Expected Progeny Differences (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait relative to other sires in the analysis. The key word is “difference”. The EPD itself does not imply “good” or “bad” performance. But rather, the EPD gives a prediction of the average difference to expect in the performance of a sire’s progeny relative to other sires in the same analysis.

The EPD for a given trait on each animal in the analysis is compared to every other animal in the analysis. The EPD is reported as a plus or minus value in the unit which the trait is measured.

Birth Weight EPD (BW) The expected difference in average birth weight (pounds) of progeny. Birth weight reflects prenatal growth.

Calving Ease Direct (CE) is expressed as a difference in percentage of unassisted births in first calf heifers. A higher value indicates greater calving ease. It predicts the average difference in unassisted births with which a sire’s calves will be born when bred to first-calf heifers.

Calving Ease Maternal (MCE) is expressed as a difference in percentage of unassisted births in first calf daughters. A higher value indicates greater calving ease. It predicts the average difference in unassisted births with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

Weaning Weight EPD (WW) The expected difference in average weaning weight of calves. The evaluation reflects the genetic influence on pre-weaning growth rate.

Yearling Weight EPD (YW) The expected difference in average yearling weight of progeny. The evaluation reflects genetic influence on both pre-weaning and post-weaning growth rate.

Maternal Milk EPD (Milk) The genetic ability of a sire’s or dam’s daughters to express in pounds of weaning weight in her calves due to her maternal ability through mothering instinct and milk.

Total Maternal EPD (MTL) A value to predict the weaning weight performance of calves from a animal’s daughters due to genetics for growth and maternal ability. Total Maternal is calculated by adding ½ the WW EPD to the Maternal Milk EPD.

Scrotal Circumference EPD (SC) The expected difference in scrotal circumference (expressed in centimeters) of a bull’s or dam’s male offspring at yearling compared to progeny of all other animals evaluated. Research has also indicated a relationship between increased SC EPD and decreased age at puberty for daughters.

Carcass records are adjusted to an age constant endpoint. Therefore selection based on any or all of the carcass merit EPD are comparable among cattle at the same age endpoint. For example selection based on increased EPD for carcass weight will result in heavier carcass weights than those animals with lower EPD for carcass weights when the cattle are harvested at the same age.

Carcass Weight EPD (CW) Expected progeny differences for Carcass Weight is a predictor of pounds of retail product at a constant age endpoint. Selection for increased values should result in heavier carcasses, while selection for decreased values should result in lighter carcass weights at the same age endpoint. Carcass Weight EPD are expressed in pounds and is a predictor of the differences in hot carcass weight between parents progeny at an age constant endpoint.

Ribeye Area EPD (REA) Ribeye area is measured from a cross-sectional area of the longissimus dorsi muscle at the 12th rib. Ribeye area is a major component of the USDA yield grade equation and selection for increased ribeye area should result in larger ribeyes and lower yield grades between animals with the same carcass weight. Ribeye area has a positive relationship with weight, the larger the animal the larger the ribeye area. Ribeye Area EPD are expressed in square inches and is a predictor of differences in ribeye area between parents progeny at a constant age endpoint.

Fat Thickness EPD (FAT) Fat thickness is measured at the 12th rib and is the primary component to the USDA Yield Grade equation. Fat thickness has a negative relationship to cutability; therefore, selection base on decreased fat thickness should result in lower yield grades and leaner cattle given the same age endpoint. Fat Thickness EPD are expressed in inches and are a predictor of differences in fat thickness between parent’s progeny at an age constant endpoint.

Marbling Score (MARB) Marbling is a subjective measure of the amount of intramuscular fat in the ribeye muscle. Marbling score is the primary component of USDA Quality grade and selection for increased Marbling Score EPD should result in cattle with higher quality grades at the same age endpoints. Marbling score has a small genetic correlation with fat, therefore producers may select for increased marbling score EPD while not changing external fat thickness when cattle are harvested at the same age-constant endpoint. Marbling EPD is a prediction of the differences in the USDA subjective marbling score between parent’s progeny at an age constant endpoint. Marbling is expressed in the same units as the USDA Marbling Score (see table below), see the accompanying table for USDA Marbling Score in the Carcass Section.

Terminal Sire Index (TSI) The AICA Terminal Sire Index (TSI) is a formal method of combing Expected Progeny Differences (EPD) – BW, WW, YW, REA, CW, MARB and FAT – into one single value on which to base selection decisions. The TSI uses estimates of the genetic relationships between traits with an economic default value based on three year rolling USDA data.

The TSI represents a dollar index per terminal progeny produced for a bull in the AICA database, ranking them for profit potential. This dollar index is to be interpreted much like single trait EPD. For example, if Sire A’s index is \$191.66 and Sire B’s index is \$200.00, then we would expect Sire B’s offspring to average \$8.34 more net return (\$200.00 minus \$191.66) than Sire A’s offspring.

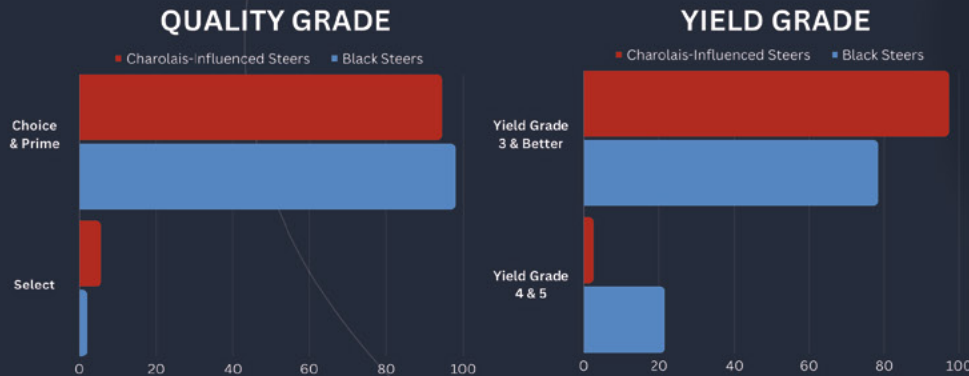

PROFIT STARTS

HERE

Charolais bulls achieve Yield Grade premiums while continuing to deliver on quality:

- Packer preferred for increasing red meat yield and carcass weight without sacrificing quality grade.
- Delivering the ability to reduce days on feed with efficient feedyard performance and feed conversion.
- Providing the ability to outperform at weaning for more dollars per head, no matter the market.

CHAROLAIS-INFLUENCED FED CATTLE COMPARISON 2100 STEERS HARVESTED 12/28/18 - 4/10/23

* 1,113 black hided steers and 987 Charolais-Influenced steers were harvested from December 28, 2018 thru April 10, 2023, at the Cargill plant in Ft. Morgan, CO. Cattle originated from Nebraska and were sired by registered Angus & Charolais bulls.
